

I use my XM all the time. The weather and the traffic stations XM offers is invaluable when I am travelling to cities I am unfamiliar with. There is nothing more frustrating than trying to find out where the traffic is and how the weather is doing as I am driving to another city. Normal radio stations do not get reception from far enough out to make a difference in what route I am gonna take. XM provides a valuable service and if local radio stations are complaining than perhaps they need to change their programming to make it better than XM for me to listen. I live in a city where all of the radio stations are terrible so XM has been a Godsend to me. Please do NOT take away XM programming like weather and traffic.
